

## Sound Broadband 3rd Quarter Newsletter

Greetings from Sound Broadband,

We're thrilled to share the latest updates as we close out the third quarter of 2024. Our 5G deployments in Socorro and Lordsburg, New Mexico, were a success, providing high-speed, low-latency broadband to these rural communities.

### 5G Success in New Mexico with Western New Mexico Communications

- **Socorro, NM:** Residents and businesses now enjoy faster internet, setting the stage for growth and technological advancement.
- **Lordsburg, NM:** Despite its rural challenges, Lordsburg is now connected with robust 5G coverage, bridging the digital divide.

### What's Next: Kansas and California

Looking ahead to Q4, we're preparing to test 5G in two key regions:

- **Coats, Kansas:** In partnership with Haviland Broadband, we're working to meet EACAM speeds and ensure exceptional network performance.
- **Yreka, California:** Alongside Cal-Ore, we're set to bring high-speed access to Siskiyou County, including Yreka.

We're proud of these accomplishments and look forward to continuing our mission of improving rural broadband access. Thank you for your support!

Warm regards,  
Dylan Larmore  
President, Sound Broadband  
Subsidiary of LICT Corporation
